

## CIS SPORTS & EDUCATION

### Education

Lighting controls provide energy management and user friendly control for educational spaces and associated administrative areas in Universities, Colleges, and Schools.

Examples of controlled areas:

- Classrooms
- Laboratories
- Lecture theatres
- Auditoriums
- Administrative offices

### Sporting Facilities

Sporting facilities require unique control functions which can only be achieved with a dedicated lighting control system.

The system can provide integrated control of:

- Sports flood lighting
- Corporate facilities
- Function rooms
- Concourse and thoroughfares
- Amenities
- Administrative areas
- External and decorative lighting

INTEGRATED SYSTEMS
