

SAFETY & CONVENIENCE IN THE HOME

SAFETY & CONVENIENCE IN THE HOME

Smoke Alarms
The FireTek™ smoke alarm range have been specifically developed to react to the different types of fire danger in the house. Photoelectric smoke alarms react to smouldering fires, while ionisation smoke alarms are sensitive to fast burning fires. Talk to your electrician about an installation plan that's right for you.

Hands Free Sensor Switch
Why fuss with a light switch in the pantry?
A Clipsal Infrascan turns on automatically when you enter and off again when you leave.

Security Lighting Control
Clipsal's Outdoor Infrascan motion sensor is an essential part of any security system, providing a welcome light for family and friends while acting as a deterrent to intruders.

Outdoor Weather Protected Switches
Designed tough to withstand rain, hail, dust and the harsh Australian sun. Perfect for easy and safe outdoor power access for blower vacs, party lights or your radio.

Smoke Alarm Models:
1. Flush Mount Smoke Alarm 755PFM Photoelectric, 755FFM Ionisation
